## OUR HISTORY

The business now known as Big Box Erectors, LLC, was originally established in Noblesville, IN and operated from 1986 to 2001 as C&S Erectors, Inc. and later CS Enterprises, Inc. Their present management team has over 52 years of direct collective experience in the erection/constriction business. They are known for: *getting the job done correctly-ahead of schedule at a very competitive price.*

In that Big Box Erectors was established in 2005, some historical information that may be required in your “*prequalification*” form may not be available. However, you may recall the highly successful management team of Gene Stoops and Pam (Dean) Stoops. They created and operated the multi-million dollar C&S Erectors, Inc. (CS Enterprises, Inc.) and specialized in large retail boxes like Wal-Mart, Lowes, Home Depot, Kohl's, and later large big-box warehouses and distribution centers. In October 2001, the business was sold to a corporation comprised of several former employees of the company. In 2004, Gene and Pam were eager to get back in to the business that both of them knew so well. They offered their experience to a Texas steel erector. Gene served as a consulting on-site field superintendent and Pam as warehouse estimator until December, 2005. It was then that they once again created their own steel erecting company.

Big Box Erectors engages top of the line staff members in outside sales, estimating, project management, construction coordination and several key foremen. We have in place a supportive banker and line of credit. Pam is back estimating and managing our Cicero, Indiana office operations. Ronnie Humphrey, our project manager, also manages our Tyler, Texas branch. Bob Burke brings to the company over 30 years sales expertise. When word got out that “Gene was back” we had numerous experienced field personnel contacting us wanting to work for Big Box. Our field crews, under Gene's direct management and training are among the best in the business...and can prove it. Not to mention the “critical path” steel erecting schedule to help expedite the building completion date... and more.

The goals of Big Box Erectors, as in the 80's and 90's, continue to be to provide our customer base with the safest, most expeditious, competitively priced steel erection job and to provide a team-oriented, safe, profitable, pleasant environment for all of our employees.

Opportunity is missed by people because it is dressed in overalls and it looks like work.  
Thomas Edison
